

Creative Full-Stack Software Engineer with 2+ years of experience specializing in advanced frontend development, interactive 3D web applications, and high-performance animations. Expert in building immersive user experiences using Three.js, WebGL, and modern animation libraries (GSAP, Framer Motion) while maintaining optimal performance and accessibility. Proficient in translating design systems into pixel-perfect, responsive user interfaces with React, Vue.js, and TypeScript. Strong background in system architecture with focus on frontend optimization, state management, and seamless API integration. Passionate about pushing the boundaries of web technology to create engaging, visually stunning applications that delight users and drive business results.

SKILLS

3D & Animation	Three.js, Three Fiber, GSAP, Framer Motion, Canvas API, Lottie
Frontend Frameworks	React, Next.js, TypeScript, JavaScript (ES6+)
State Management	Redux, Zustand
Backend Integration	RESTful APIs, Node.js, Express,Hono
Tools	Git, Webpack, Vite, Figma, Adobe Creative Suite
Communication	English,Tamil

TECHNICAL EXPERIENCE

Full-Stack Developer <i>Teceze</i>	2026 — Present <i>jaffna,srilanka</i>
--	---

- **React.js Development** - Building modern, component-based user interfaces with React library
- **Next.js Framework** - Developing server-side rendered and static web applications using Next.js
- **Responsive UI/UX Design** - Creating adaptive layouts that work seamlessly across all device sizes and screen resolution
- **Component Architecture** - Designing and implementing reusable, maintainable component structures
- **Hono Framework** - Building lightweight, high-performance web applications using Hono
- **Node.js Development** - Creating scalable server-side applications with Node.js runtime
- **RESTful API Development** - Designing and implementing REST APIs with proper endpoints and HTTP methods
- **API Architecture** - Structuring robust, maintainable API layers
- **API Documentation** - Creating clear API documentation for endpoints and usage

Associate Software Engineer <i>speedcode labs</i>	2024 — 2026 <i>jaffna,srilanka</i>
---	--

- Designed and developed reusable UI component libraries and design systems for scalable application architecture
- Built custom React components with advanced props handling and composition patterns
- Implemented React Hooks for state management, side effects, and component lifecycle optimization
- Configured and maintained client-side routing solutions for seamless navigation experiences
- Architected centralized state management using Redux with Redux Saga for asynchronous data flow
- Integrated RESTful APIs with Redux middleware and Saga for efficient data fetching and caching
- Developed secure authentication workflows and user authorization systems
- Created robust form validation and handling solutions using Formik with custom validation schemas

Intern Software Engineer <i>speedcode labs</i>	2024 <i>jaffna,srilanka</i>
--	---------------------------------------

- UI Implementation(CSS,Tailwind)
- Component-Based Development(JSX,Props)
- Cross-Browser & Device Compatibility(responsive)
- UI Design(Figma,Illustrator)

Graphic Designer <i>aa sports</i>	2020 — 2022 <i>mannar,srilanka</i>
---	--

- Visual Design Creation(Photoshop,Illustrator)
- Creativity and artistic sense
- Strong visual and design principles (typography, color, layout)

PROJECTS

Front-end Developer / FIELDTECHY <i>Teceze</i> • Advanced Freelancer Search - Find talent by skills, location, ratings, rates • Job Search for Freelancers - Filter projects by category, budget, timeline • Saved Searches - Store frequently used search criteria • Smart Recommendations - AI-powered job and talent matching • Job Posting System - Clients create detailed project listings • Dual User Roles - Separate registration for clients and freelancers • Profile Creation - Detailed profiles with skills, experience, and portfolios • Proposal Submission - Freelancers submit detailed project proposals • Account Types - Individual freelancers and agency accounts	2026
Front-end developer / SOCIAL MEDIA APP <i>speedcode labs</i> • User Post Sharing - Allow users to create and publish posts to the platform • Dynamic News Feed - Personalized, real-time feed displaying relevant content to users • User Profiles - Individual profile pages for each user to showcase their identity and activity • Like System - Enable users to like posts and show appreciation for content • Comments - Allow users to comment on posts and engage in discussions	2025
Full-stack developer / MTM BASED ECOMMERCE SYSTEM <i>speedcode labs</i> • Base Product Catalog - Core menu items available for customization • Ingredient Library - Comprehensive list of available ingredients with pricing • Add-ons & Extras - Optional upgrades and premium ingredients • Pricing Calculator - Real-time price updates based on selections • Delivery Scheduling - Choose delivery time slots for fresh preparation • Pickup Options - Select store pickup with ready-time estimates	2025
Full-stack / FOODIE APP <i>rksolutions</i> • Restaurant Discovery - Browse and explore various restaurants and eateries • Dish Exploration - Search and discover specific dishes and menu items • Advanced Search Filters - Filter by cuisine type, location, price range, and ratings • Category Organization - Organized content by food categories and restaurant types	2024

EDUCATION

Higher National Diploma in Information Technology , SLIATE	2024
---	------

CERTIFICATION

Fast API development
UI/UX Designing
Claude code Essentials
N8N workflow
Design App
Java Programming
Arduino
